

TRAINING

Product Owner Foundation

This training course provides a comprehensive introduction to the role of the Product Owner. Participants will learn the basics of Scrum and the responsibilities of the Product Owner. The training course specifically prepares participants for the Professional Scrum Product Owner I (PSPO I) certification and provides practical methods for successful product development.

Content

- ✓ Introduction to the Scrum Framework
- ✓ Responsibilities and Tasks of a Product Owner
- ✓ Defining and Developing a Product Vision and Roadmap
- ✓ Prioritizing the Product Backlog to Maximize Product Value
- ✓ Managing Requirements and Writing of User Stories
- ✓ Engaging and Aligning with Stakeholders
- ✓ Release Management and CI/CD (Continuous Integration / Continuous Delivery)
- ✓ Exam Preparation for the Professional Scrum Product Owner I (PSPO I) Certification

Methodology

This training course combines theory with numerous practical exercises, case studies, and simulations. Participants will receive access to the training materials prior to the start.

Target Group

This training course is aimed for aspiring Product Owners and those interested in the role with no or basic experience and would like to prepare for the PSPO I certification.

Prerequisites

Basic knowledge of agility is recommended. Ideally you have already gained some experience in an agile setting. However, prior knowledge is not mandatory.

Certification

Upon completing the training course, participants are well prepared for the PSPO I exam and can take the certification test. The exam fee for one attempt is included in the training course.
